- Audio/Video setup, config, training
- Audio/Video Consulting
- Computer setup and configuration
- Network Configuration
- Printer setup, troubleshooting, configuration
- Mobile Device troubleshooting
- Live Sound setup, mixing, training
- I.T./Network Consulting

Pricing-

For business services, there are three methods of billing:

Hourly- Generally \$75/hour for most jobs, minimum of 1 hour.

Project- I will come and evaluate a project and write up a project estimate that includes labor and a list of materials: I require that the customer purchases the materials before the project starts, I do not provide materials or purchase these for the client. Some companies buy the materials and then re-sell them to the clients, I do not do this. Instead, I will research what you need and then send you website links from which to order the needed materials at the best price I can find. That way you know that you are getting what you need, and not being charged more than the cost of the materials.

Retainer- I offer retainer packages for small and medium-sized business at a reduced rate from the normal hourly rate. Packages start at as few as 10hrs/month. These packages are generally used for maintenance and emergency services. The retainer agreements allow for a maximum number of hours per month, and, depending upon the length and terms of the agreement, can include a minimum number of hours and also specific scheduled tasks. Retainer packages range from 10hrs/month up through 40hrs/month as fits the client's needs.
