- Home Entertainment System Setup and Troubleshooting
- Computer setup and configuration
- Network Configuration
- Printer setup, troubleshooting, configuration
- Mobile Device troubleshooting

Pricing- There are two different methods of billing for residential services, hourly and project.

-Hourly rates are for small jobs and most minor emergency services. Hourly rates are dependent upon the type of job: call with your problem and I will give you the rate after hearing a description of the need.

-Project rates are for larger or pre-planned jobs, including major emergencies. I will survey the need, either by a phone consultation or by coming in to the home and looking over the needs and give you a flat rate for the project, even if it exceeds the estimated time-frame for the service.
